

WIFI BUILT TO MAKE LIFE EASIER

EE PROPERTY WIFI GIVES NHS RESIDENTS THE CONNECTIVITY THEY DESERVE—SO THEY CAN WORK, LEARN AND PLAY SEAMLESSLY.

Dorset County Hospital chose EE Property WiFi to provide broadband services for our key workers. We, as the estate team, wanted to make sure broadband was in and working for key workers and their families as soon as they moved in, but didn't want to have the hassle of ordering individual residential broadband lines and then having to manage them ourselves.

A fully managed service from EE solved those problems and the accommodation team have had nothing but compliments about the service from the residents so far. The installation was project managed and delivered right first-time, and we've found the onboarding process of new residents, using the intuitive online portal, to be easy.
